

Physics at Green and White Day (9-23-2017)!

The Physics Department always has cool demos for you to experience and play with at Green and White Day! Come check us out! Below we see Dr. McBride showing students the concept of Conservation of Angular Momentum (why a figure skater spins faster when they pull their arms in).

Green and White Day is a fun half-day event intended for high school juniors and seniors who would like a more in-depth look at what Marshall University has to offer – come visit the Physics table at the College of Science Showcase, we would love to talk about the opportunities that exist for you within the Physics Department. Students and parents will have the opportunity to meet with professors from the Physics Department at the College of Science Showcase on Green and White Day. We would be happy to answer any questions you may have. If you would like to tour the Physics Department while here for Green and White Day, contact mcbrides@marshall.edu.

You can view a [sample agenda](#) here (schedules vary from semester to semester slightly). Our Fall Green and White Days will take place on Saturday, September 23, and Friday, November 10, 2017. [Register](#) for these events and reserve your spot today or call Dr. Sabrina Simpson at 304.696.2246 if you have general questions. If you want to contact someone in the Physics Department directly or have questions about the Physics Department, contact Dr. Sean P. McBride at 304-696-2758 or email mcbrides@marshall.edu.
