

On 4-27-18, students from Logan HS had a fun time while learning about projectile motion at one of the spring Projectile Motion Workshops held by [Dr. Sean P. McBride](#) in the [Department of Physics at Marshall University](#). The event was sponsored by the Physics Department within the College of Science. [Society of Physics Students](#) member Chase Preston and Eric Gandee & Jeremy McCloud, students from Dr. McBride's PHY 211 University physics class, assisted with guiding the students through the kinematics equations in two dimensions associated with projectile motion.
