Chemistry 212  
Principles of Chemistry II

Handouts: All available on-line @ science.marshall.edu/castella/c212.html

- Lecture notes for all chapters
- Homework assignments
- Study suggestions
- A set of old tests & answer keys
- An old final exam

(Note: As of the production of this syllabus not all of the materials noted above are completed and on the web. Please check regularly for their appearance on the internet.)

Instructor: Michael Castellani
Office: 450 Science Hall  
Lab: 407 Science Hall  
Phone: x6486

April 30 (Saturday) 10:00 a.m. Final Exam

Office hours: Monday, Wednesday, Friday: 10:00 to 11:00 a.m.

During office hours I may be in either my office or laboratory (across the hall from the lecture hall). Please check both places for me.

If you cannot come by during scheduled office hours or if you have questions at other times, please feel free to drop by my office or schedule an appointment. I frequently unavailable from 11 - 12 Tuesdays and Thursdays and 2-3 on Fridays.

If you have questions that you believe can be answered by email and would like to use that method, please feel free to send them to me. I check my email regularly throughout the day.
**Attendance**

Attendance for this course is optional, but strongly encouraged. With nearly all the material for this course available on the internet, there will be a temptation to miss class more often than if you needed to come to obtain the lecture notes, homework assignments, and other materials. There is a strong correlation between attendance and success in chemistry courses. While good study habits are the most important determiner of success, students who regularly attend class are more likely to keep up with assignments than those who miss frequently.

**Grading**

Tests will be given after Chapters 14, 16, 19, 21 and 22 regardless of the dates listed above. The dates provided on the first page are only approximate.

Beginning with the second test, up to 20% may review previous material in this course. The first test may include review material that we discuss from Chapter 11.

Tests (5 x 100 points) 500 points  
Final Exam 200 points  
700 points

There are no dropped tests and no make-up tests will be given.

During tests talking to each other and sharing of calculators are forbidden.

Calculators with alphanumeric and/or graphing capabilities are not permitted for tests or the final exam. If you have questions regarding your calculator, I will be glad to look at it. Make sure you do this before the day of a test.

During tests you may not use your own paper or other materials except your pen or pencil and calculator.

If a test falls on a day that is cancelled by the university (e.g. a snow day), the test will occur on the next period the class meets.

Please turn off cell phone ringers before class. Failure to do so may result in you being removed from the room, even during a test.
